## What is claimed is:

5

15

25

1. An interlabial pad having a size capable of being easily inserted between female labia, comprising:

a pair of absorbing sheet bodies for absorbing body fluid,

wherein each of the absorbing sheet bodies is unbonded at right and left side edges in respect of a longitudinal direction while bonded at both ends in the longitudinal direction.

2. An interlabial pad as claimed in claim 1, wherein said pair of absorbing sheet bodies comprising:

a main sheet body comprising:

a first permeable surface side sheet facing a body side;

a first permeable or impermeable back side sheet facing an opposite side to the body side; and

a first absorber for absorbing body fluid;

wherein the first permeable surface side sheet and the first back side sheet are bonded each other to enclose the first absorber; and

a sub-sheet body comprising:

a second permeable surface side sheet facing a body side;

a second permeable or impermeable back side sheet facing a

20 garment side; and

a second absorber for absorbing body fluid;

wherein the second permeable surface side sheet and the second back side sheet are bonded each other to enclose the second absorber.

3. An interlabial pad as claimed in claim 1 or 2, wherein the unbonded areas of said main sheet body and said sub-sheet body in the right and left side edges are line-symmetrical with respect to a center line in the longitudinal direction of the interlabial pad.

- 4. An interlabial pad as claimed in claim 1 or 2, wherein said unbonded areas, in each of the right and left side edges in respect of the longitudinal direction of the interlabial pad, are formed in a range of 2/5 to 4/5 of a whole portion of each side edge.
- 5. An interlabial pad as claimed in claim 1 or 2, wherein the length of said main sheet body in the lateral direction is equal to that of said sub-sheet body in the lateral direction or shorter than that of said sub-sheet body in the lateral direction.

5

20

25

- 6. An interlabial pad as claimed in claim 1 or 2, wherein a stiffness of said main sheet body in the lateral direction is smaller than that of said sub-sheet body.
  - 7. An interlabial pad as claimed in claim 6, wherein the stiffness of said main sheet body in the lateral direction is not more than 1.5 mN.
  - 8. An interlabial pad as claimed in claim 1 or 2, wherein said first absorber inside said main sheet body has a line for inducing bending in the center of the lateral directions.
  - 9. An interlabial pad as claimed in claim 1 or 2, wherein said sub-sheet body includes a protruded area, which is protruded towards the body side.
  - 10. An interlabial pad as claimed in claim 1 or 2, wherein said sub-sheet body further includes a mini sheet piece for forming a finger insertion opening between said second back side sheet and the mini sheet piece on the garment side of the second back face side sheet of said sub-sheet body.
  - 11. An interlabial pad according to claim 1 or 2, wherein the interlabial pad is used together with a sanitary napkin.
  - 12. An interlabial pad according to claim 1 or 2, wherein said interlabial pad is a pad for an incontinence of urine.
    - 13. An interlabial pad according to claim 1 or 2, wherein said interlabial

pad is a pad for absorbing vaginal discharge.

14. A wrapping body comprising:

an interlabial pad as claimed in claim 1 or 2; and

a wrapping container for individually wrapping the interlabial pad;

wherein the interlabial pad is enclosed in the wrapping container.

15. A wrapping body comprising:

5

an interlabial pad as claimed in claim 10; and

a wrapping container for individually wrapping the interlabial pad,

wherein said interlabial pad is enclosed in said wrapping container such

that the interlabial pad is orthogonal to the wrapping container.
